December 2015

'Everyone was running'

One dead after driver mows down pedestrians on Vegas Strip

| Woman detained after hitting 37 people

Sandy Hook December 2013

San Bernadino 2015

First on Scene ? First in COMMAND !

National Incident Management System
It's the **LAW** and it applies to EMS Too!

The Truth about TRIAGE...

- It's a very "un-natural" process for us...
- You work **ALONE**
- You provide care later
- You have "skimpy" resources

We practice essentials of MCI management in a perfect world, but your basic plans must rely on chaos and a "fast break" operations !

What's in your ambulance NOW is better than stuff in the MCI Trailer that's 30-45 minutes away !

There will be CHAOS
Got your trusty "bar code" reader?

During MCIs think good BLS NOT ALS !

Command Etiquette

Establishing Command
Passing Command

Command Modes

1. Arrive - Establish Command -
Give an Arrival Report

2. Size-Up-360 - Triage - Initial Actions -
Request Resources

3. Pass Command or Assume a
Command Position

1. Establish Command

Give an Arrival Report

Not FIRST ?
Establish Medical Branch

2. Size-Up-360 - Triage - Initial Actions - Request Resources

IMMEDIATE	DELAYED	MINIMAL
1	2	3

3. Pass Command or Assume a Command Position

Create a **SAFE ZONE** !

ALL ambulances line up with traffic flow ! Downstream !

First In ? Last Out !

Command and EMS Branch Functions

The Medical or EMS Branch

First Arriving Ambulance

- Medical Branch**
- Medical functions plus
 - Transport Unit Functions

- Triage Unit**
- Triage functions plus
 - Treatment Unit Functions

EMS Incident Management Tactics

Arrival and Establish Command

1. Position unit to facilitate sequencing
2. Establish Command and transmit arrival report
3. Put PPE on BEFORE leaving the ambulance
4. Don Bib/ Grab triage kit
5. Assign triage unit lead, bib and kit
6. Number cars with paint/crayon

Primary Triage

1. Global sort Walk-Wave-Still
2. Target- STILL pts THEN those who can WAXE
3. Assign tag and color-NO WRITING
4. Provide lifesaving care PRN
5. Triage tally # of RED-YELLOW-GREEN-GREY-BLACK

Update Disp/Call Resources

1. Confirm Tac channel assignment
2. Make mutual aid request
3. PASS COMMAND as necessary
4. Have dispatch advise inbound where to sequence

Assign Units to Tasks

1. Is TRANSPORT and TREATMENT needed?
2. Assign crew to TREATMENT + TRANSPORT
3. Stick close with FIRE COMMAND
4. Prepare to assign incoming units
5. Meet "face to face" to give assignments
6. Start a tactical worksheet
7. Consider an aide
8. Consider alternate XPT for GREENS

Treatment and Transport

1. Avoid having a "collection point" if possible
2. Have dispatch do hospital roll call
3. Determine hospital capacity
4. Everybody is TAGGED and TRACKED
5. Get the RED patients OUT FIRST!

First 5 minutes sets the stage for the next 5 hours!

4. TRIAGE and Tally!

TRIAGE

Do the greatest good for the greatest number of people !
Efficient use of resources

TRIAGE Unit

TRIAGE Unit Leader

1. GET ALL PATIENTS TRIAGED AND TAGGED BY CATEGORY!

IMMEDIATE (ALS- Needs stretcher)

Expectant-Not likely to survive

DEAD

DELAYED (BLS- Needs stretcher)

MINIMAL (Minor inj/ Ambulatory)

EVERYBODY GETS A TAG !
TRACK # OF PTS AND CATEGORY

2. COMMUNICATE WITH MEDICAL BRANCH

A-Report CASUALTY COUNT and CATEGORY

B-Request resources to move patients- Manpower/Backboards/Stretchers

3. GET PATIENTS MOVED TO TREATMENT OR TRANSPORT

A-Get patients moved to either Treatment or Transportation

B-When patients are moved, report to MEDICAL Branch for reassignment

4. GET the RED OUT !

1. Primary objective is to Get the RED off the scene FIRST

2. All injured rescuers are tagged RED

POLITIS

The Truth about TRIAGE...

- It's a very "un-natural" process for us...
- You work ALONE
- You provide care later
- You have "skimpy" resources

THE GOAL ?

GET THE RED OUT !

October 16, 1991
Luby's Killeen, TX
23 killed and 20 wounded

Prepare for success!

SALT TRIAGE !

Sort
Assess
Lifesaving Intervention
Triage

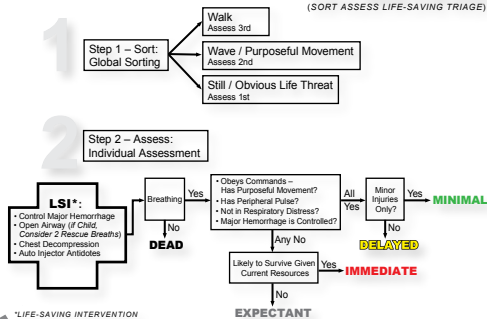

SALT TRIAGE !

- Evidence Based
- Driven by the CDC
- Supported by all National EMS Organizations
- Our New National Standard

S.A.L.T. TRIAGE FLOW SHEET (SORT-ASSESS-LIFE-SAVING TRIAGE)

SALT - Global Sort

SALT Triage First Step

Step # 1
Initial Sorting

Walk
P-3
Assess LAST

Wave
P-2
Assess SECOND

Still
P-1
Assess FIRST

- Control Major Hemorrhage
- Open Airway (if Child, Consider 2 Rescue Breaths)
- Chest Decompression
- Auto Injector Antidotes

IMMEDIATE • Respiratory Distress! • Bleeding Uncontrolled (major) - NO Peripheral Pulses • Does not obey command - Non purposeful movements • Likely to survive given current resources
DELAYED • NOT in Respiratory distress • Bleeding Controlled - Has Peripheral Pulses • Obeys command-Purposeful Movements • Non-Ambulatory
MINIMAL • NOT in Respiratory Distress • Bleeding Controlled - Has Peripheral Pulses • Obeys Command - Purposeful Movement • Ambulatory and MINOR Injuries
EXPECTANT

SALT Triage - Global SORT FIRST!
Walk - Wave - Still
Perform Lifesaving Interventions as you go!

IMMEDIATE

- Respiratory Distress!
- Bleeding Uncontrolled (major) - NO Peripheral Pulses
- Does not obey command - Non purposeful movements
- Likely to survive given current resources

• Non-Ambulatory

EXPECTANT

Not likely to survive given current resources

DEAD

Not breathing after 2 ventilations

SALT Triage - Global SORT FIRST!
Walk - Wave - Still
Perform Lifesaving Interventions as you go!

Tally Card Carried During TRIAGE

T-3 TRIAGE TALLY CARD

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	18	19	20	
IMMEDIATE									
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	18	19	20	
DELAYED									
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	18	19	20	
MINIMAL									
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	18	19	20	
EXPECTANT									
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	18	19	20	
DEAD									

You MUST Keep a Master Triage Tally

TRIAGE	1-RED	2-YELLOW	3-GREEN	E-EXPECTANT	0-BLACK
Transport guideline	One/Ambulance	Two/Ambulance	Four/Ambulance	Transport PRN	NO TRANSPORT
TOTALS					
# of Amb Needed			Consider BUS		0

This helps determine resources!

Saratoga County MCI Tactical Worksheet Tac Channel _____

Establish Command/ Create a SAFE ZONE
 Confirm Tac Channel Assignment
 Transmit an Arrival Report
 Do a 360 Size-Up and Mitigate Hazards

Triage and Tally the Casualties
 Request/Assign Resources
 Place Units in SAFE Zone- In Sequence or Back In
 Transfer Command ASAP/ Assume Medical Branch Ops

TREATMENT/CASUALTY COLLECTION- OBJECTIVES

1. COLLECT PATIENTS ON TARPS BY CATEGORY

IMMEDIATE (ALS and needs stretcher)

Expectant-Not likely to survive

ASSURE PTS ARE TAGGED !

DELAYED (BLS and needs stretcher)

PROVIDE LIFESAVING CARE WHILE

MINIMAL (Minor inj/ambulatory)

WAITING FOR TRANSPORT

2. Primary Tactical Objective is to GET the RED OUT !

1. Primary objective is to Get the RED off the scene FIRST

2. All injured rescuers are tagged RED

3. Work with EMS Branch and TRANSPORT to move RED patients ASAP

3. COMMUNICATE WITH TRANSPORT

A - Assign transport resources to high priority patients

B - Re-Triage patients as necessary

4. GET PATIENTS MOVED from TREATMENT to TRANSPORT

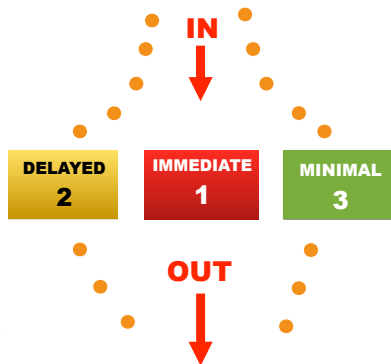

A-Get patients handed off to TRANSPORT

B-Assure all patients have a Triage Tag and are being Tracked by TRANSPORT

5. Set up Color Coded Tarps and Cone Chute

POLITIS

The "Classic" Collection Point

POLITIS

Use Air Medical Resources Wisely !

Know your specialty resources !

Level 1 Trauma ? Burns ? Amputations ?
Carbon Monoxide - Hyperbaric Medicine ?

Five Tasks... Five Minutes

1. Establish Command and Create a Safe Zone
2. Give an arrival report
3. Size Up and Scene Safety
4. Triage and tally
5. Request/Assign Resources/**Transfer Command !**
