Red Rule of
Medication
Administration

Medication Administration Cross-Check[®] (MACC) v3.7

Provider 1
(Giving the medication)

Provider 2
(Remember: "R.C.V." or "R.C.Q.")

"Med-Check" or
"Safety-Check" or
"Cross-Check"

"Ready"

"I am going to give:"
Dose
Drug name
Route
Rate
Reason

Concurrence

"Contraindications?"

If none state
"No Contraindications"
Otherwise verbally verify

Concurrence

"Volume?"
(or "Quantity?" for PO)

- State the drug concentration
- State volume to be administered in milliliters [Do not say "amp" or "vial"] or state # of tablets
- Show the vial/ bottle to provider 2 (if safe to do so)

Concurrence &
Positive
Visual
Verification

Sounds good,
give it,
go ahead, etc.

- "Contraindications" include: 1) verification of appropriate VS, 2) known patient allergies, and 3) expiration date.
- If a discrepancy, disagreement, or need for clarification is encountered at any step in the process, it must be resolved prior to continuing the cross-check.
- Essentially only Provider 2 can authorize the administration of the medication.
- The MACC must be completed prior to the administration of any medication.
- If there is an interruption or change in patient condition of any kind, the process must be re-initiated by Provider 1.
- Avoid ambiguous statements or confirmations like "okay."

RED RULE of Medication Administration
(A Duty to Avoid Causing UNJUSTIFIABLE Harm)

NEVER give the contents of a syringe that is not labeled or without visualizing the vial or ampule from which it was immediately drawn.

Let them fail.

Ability is acquired

Errors as a natural part of the learning process

IT ISN'T FAILURE UNLESS YOU STAY DOWN

In Stock.

Sold by **Avalanche Brands** and Fulfilled by Amazon. Gift-wrap available.

- **TERRIFYINGLY REALISTIC FAKE BLOOD** – Engineered with a guilty conscience to be terrifyingly realistic, this fake blood splatters, sprays, drips and dries just like the real thing.
- **SIMULATE UNTOLD NUMBER OF GORY MISFORTUNES** – Perfect for creating cuts, wounds, bites, tears, abrasions, gashes, lacerations, stabblings, hemorrhages, amputations, de-gloving, and whatever else you can come up with.
- **ALSO GOOD FOR CRIME SCENES** – Like real blood, which is good for keeping you and your vampire paramour alive, I Can't Believe It's Not Real Blood is versatile. Apply it to skin as well as clothes, floors, doors, walls, and/or windows. It may or may not pass a CSI lab analysis.
- **TIPS FOR BLOODY CLEAN UP** – It looks good in person and on camera... and tends to keep looking good. While a few scrubbing will get rid of it, consider applying Vaseline or lotion to skin before use. Also, we highly discourage drinking and consumption.
- **LUCKILY THERE'S A LOT OF IT** – Feel free to use this bottle liberally, as you have 16 ounces of quality fake blood that won't dry out any time soon and doesn't need to be refrigerated. Here at Maven Gifts, we only needed half a bottle to convince our boss of a Bubonic Plague outbreak, securing a well-deserved three-day weekend.
