

## **Do You Have A Vehicle To Donate?**

To All Fellow Emergency Services Providers:

Thousand Islands Emergency Rescue Service (TIERS) is the 911 ambulance service provider for the towns of Orleans and Clayton in northern Jefferson County New York.

Our response district consists of 154 square miles of mostly rural terrain and encompasses a large portion of the St. Lawrence River along the US/Canadian border. We staff paid paramedics 24/7/365 and supplement our capabilities with volunteer Emergency Medical Technicians and Drivers. As a not-for-profit service we strive to commit our organization to community service and excellence with continued training and public awareness programs.

Our call volume has grown by one quarter in the past two years due to the overwhelming requests for mutual aid into our neighboring districts. These requests are mostly for ALS service or the inability of the area departments to muster medical assistance. Since we do not have a “squad car” or “fly car capabilities” we have to send an ambulance for these mutual aid responses. It certainly would be more beneficial to send just our Paramedic and the fly car.

Our annual budget is extremely tight and we are unable to purchase a vehicle to service this purpose at this time or into the distant future. We are seeking the opportunity or possibility of getting a capable good used SUV or other similar type vehicle as a donation to our service or as a gift to our town municipality from a service that may have a vehicle that could meet the need.

Should your fire district; department, municipality, or service have a vehicle that could be used for our purpose and would be willing to gift it or donate it to our service or municipality please contact us at the following:
