

1/1/10

I just wanted to let you know that the Department of Health is in the process of printing 1,000,000 Patient Care Reports forms. We expect delivery in the not too distant future. Once we get the forms, they will be shipped to our EMS program agencies for immediate distribution. Since the arrival of the PCR shipment has not yet been provided to the DOH, we have advised EMS transporting agencies that if they are interested in printing PCRs locally, they must print the approved DOH form and that they should only obtain a supply that will hold them for 60 days or so.

I would appreciate it if you could share this information with your EMS constituency.

Thanks and Happy New Year!

Lee
