

EMERGENCY MANAGEMENT

North Shore-Long Island Jewish Health System

Disaster Preparedness for Hospitals and Healthcare Organizations Within the Community Infrastructure MGT - 341

Presented by Texas Engineering Extension Service -

This course introduces the various natural, technological, and civil hazards, to which hospitals and healthcare organizations may be vulnerable, and the potential impacts of those hazards. Federal guidelines and legislation that serve to aid in the preparedness for, and response to, incidents involving these hazards are discussed, as are current emergency management standards for the hospital community. Participants review response and recovery issues that should be addressed by medical facilities and organizations in preparation for a large-scale incident, including identification of critical resources necessary for response and recovery.

Topics: What are We Preparing For? - Fundamentals of Preparedness - Preparing the Response - Preparing the Recovery

Course Length: 16 hours (2 days)

Target Audience: Managers and healthcare managers, Department heads, directors, assistant directors and senior medical staff, Regulatory personnel, Health department personnel, Local emergency planning directors/managers, Emergency service managers/administrators, Healthcare providers, Emergency preparedness planning personnel
