12-lead ECG Interpretation Course

Presented by: Bob Page

12 Lead ECG Interpretation Workshop
A Nationally acclaimed course adopted by the Critical Care Paramedic Course curriculum at the University of Maryland, Baltimore County.
Topics covered in this Course include:

- Proper Lead Placement
- Axis and Hemiblock determination
- Bundle Branch Blocks
- Differentiating Wide Complex Tachycardia
- Myocardial Infarction recognition
- 15 lead ECG

The course includes a workbook with practice problems and handy charts for rapid use in the field. Participants in the program will read about 200 12 lead ECG’s gaining both experience and confidence in their newly learned skill.

Slap the Cap: The Role of Capnography in EMS
Participate in one of the first nationally presented courses on capnography in emergency medicine. This comprehensive course is designed to supply you with the knowledge background necessary to understand the full spectrum use of capnography as a diagnostic tool. Just as the 12 Lead ECG is a diagnostic tool for acute coronary syndromes, capnography is a diagnostic tool for ventilation and perfusion.
Topics covered in this Course include:

- The principles behind CO2 and EtCO2 measurement.
- Technology of EtCO2 measurement and capnogram waveforms
- Clinical applications of capnography.

Stethoscopy for Dummies
How much did you pay for your stethoscope? How much training did you get on how to use it? This will fill the gap. In this session, participants are provided down to earth “for dummies” information on various types of stethoscopes and how to use them to get the most out of patient assessment.

COURSE LOCATION:
Hofstra Northwell School of Medicine
500 Hofstra Boulevard
Hempstead, NY 11549
