The effects of sports-related injury and illness range from a day of discomfort to life-long impairment. Prompt recognition and treatment are essential to maintain the health of an athlete. Join Phelps Memorial Hospital Center experts in neurology, orthopedics, and cardiology for a day of Sports Medicine Education. Pre-hospital providers, athletic trainers and coaches will receive the latest information for identifying and managing sports-related injuries and medical conditions. Phelps is pleased to provide this continuing education program, a light breakfast and lunch at no charge.
