ADVANCED HAZARDOUS MATERIALS TECHNICIAN CLASS

OFFERED BY NYS OFFICE OF FIRE PREVENTION & CONTROL (OFPC)

July 27-31, 2015  8 am to 4:45 pm, or prevailing time as designated in class

Training Course to be held at the Nassau County Fire Service Academy, Old Winding Road, Old Bethpage, NY

Scope of Training: Advanced Hazardous Materials Technician
This course provides participants with advanced leak and spill control techniques as well as containment procedures above and beyond what is contained in Hazardous Materials Technician course.

Both classroom and practical exercises will develop critical skills for leak control, fire control, and spill control objectives. Advanced site safety practices will be discussed, use of analytical instrumentation will be applied, and special considerations involving weapons of mass destruction will be covered. Students gain hands-on experience with detection instruments, protective clothing, and leak control equipment.

Designed for: Emergency response personnel trained and employer certified at the hazardous materials technician level. This course builds upon and supports the competencies found in 29 CFR 1910.120(q)(6)(iii) of OSHA.

Course Length: 40 hours  [Course Number : 01-09-0002]

Prerequisites: Previously completed Hazardous Materials Technician and ICS-100.
Signed Training Authorization Letter required

Advanced Registration required as this class has a maximum student capacity.

To register for this class, contact the Nassau County Fire Marshal's Office by calling (516) 573-9961. Provide student name, contact telephone number, student e-mail address, and Department affiliation. Also acknowledge that prerequisites (listed above) have been met. Any questions, please e-mail: aschmitt@nassaucountyny.gov

All personnel accepted into the class will receive a confirming e-mail reply, with the Training Authorization Letter to be completed by you and your Department.

Please bring the confirming e-mail and Training Authorization Letter to class on the first day of training.
