Program Goals
The Pediatric and Neonatal Critical Care Transport Program is designed to prepare paramedics and nurses to function as members of a pediatric and/or neonatal critical care transport team. Critical pediatric/neonatal patients that must be transported between facilities require a different level of care from hospital or emergency field patients.

Participants will gain an understanding of the special needs of pediatric and neonatal critical patients during transport, become familiar with the purpose and mechanisms of hospital procedures and equipment, and develop the skills to maintain the stability of hospital equipment and procedures during transport.

Curriculum Design
The PNCCT Program is designed to provide the basic educational foundation required for specialists transporting critical care patients. In addition, it may serve as a springboard for those institutions looking to expand into critical care.

To Sign Up
Please follow the link below.

Enrollment is first come first served. Any question please email schiang@nshs.edu

Participants
The Pediatric and Neonatal Critical Care Transport Program brings paramedics and nurses together in an effort to bridge the gap between prehospital and hospital care. The result is a specialized care provider that has an understanding of both aspects of pediatric and neonatal patient care, and uses the understanding to provide the highest level of care to critical patients during transport.

Paramedic requirements: Recommended one (1) year as a paramedic, current certifications in CPR, NRP, and PALS/PEPP.

Nurse requirements: Recommended one (1) years as a nurse, current certifications in CPR, NRP, and PALS/ENPC.

Where
LIJ Medical Center
270-05 76th Avenue
New Hyde Park, New York 11040
Teaching Center* (level G of the Oncology building).

Cost
$750
