The Definitive EMS Airway Course

- Learn the full range of airway management techniques — including use of extraglottic devices, medication-assisted intubation, video laryngoscopy & other advanced imaging devices, and cricothyrotomy.
- Work with experienced faculty who know the unique challenges facing EMS providers.
- Use all of the airway devices in small group sessions.
- Practice decision making and airway techniques in Code Airway™ stations.
- Face the most challenging patient scenarios in a no-risk environment. These include elevated ICP, pulmonary edema, status asthmaticus, foreign body in the airway, direct airway trauma, multiple trauma with shock, and many more.
- Meet your continuing education requirements. This two-day course is approved by CECBEMS and ASTNA.
- Receive the definitive airway textbook, Manual of Emergency Airway Management by Ron Walls, MD and Michael Murphy, MD.
