Land Navigation
July 16-17, 2016

Course Description:
Land Navigation is a two-day course that relies upon both classroom instruction and skill lanes that allow students to demonstrate basic map reading and land navigation skills, using topographical maps, baseplate compasses, pace counts and survival concepts. Classroom-based modules provide students with the necessary information to successfully complete skill lanes. The skill lanes are intended to address specific areas of focus and to target higher level objectives, especially route planning involving judgment and decision making. The GPS device used in the course is a Garmin eTrex 20 handheld unit. If students wish to bring their own personal device, they must have adequate prior knowledge of the unit.

The skill lanes include a five-mile course that will require students to apply the skills learned from the classroom modules and include instructor-led discussions of basic survival skill concepts in woodland and rural environments.

Course Provider:
This course is being taught by a team of instructors from the State Preparedness Training Center and the National Center for Security & Preparedness.

Topics Include:
- Map and Compass Reading Techniques
- Pace Count Methods
- Proper Use of a GPS Device
- Route Planning Techniques and Obstacle Considerations
- Woodland Survival
- Land Navigation Course

Times:
July 16-17, 2016
Registration and Check-In: 7:30 AM - 8:00 AM
Course: 8:00 AM - 5:00 PM
