Bleeding Control for the Injured: As Community First Responders

Presented by Southside Hospital: As a member of the Northwell Health Trauma Institute

This course is designed for law enforcement officers, firefighters, security personnel, teachers and other civilians interested in learning this basic and lifesaving training.

The idea is that everyone should be prepared to perform basic hemorrhage control to prevent deaths from blood loss. You never know when you could become a victim or bystander to a tragic bleeding injury or mass causality event.

At the completion of the Bleeding Control (B-CON) course participants will be able to:

- Explain the rationale for early use of a tourniquet for life-threatening extremity bleeding.
- Demonstrate the appropriate application of a tourniquet to the arm and leg.
- Describe the progressive strategy for controlling hemorrhage.
- Describe appropriate airway control techniques and devices.
- Demonstrate the correct application of a topical hemostatic dressing (combat gauze).

Please join us for this lifesaving “Stop the Bleed” campaign training.

**Venue:** West Islip Fire Department Headquarters  
309 Union Blvd, West Islip, NY, 11795

**Date/Time:** May 18th 7:00 – 9:30 pm

---

Bleeding Control Fact:  
“The Hartford Consensus Group recommends that the response to a traumatic incident, whether involving an active shooter or some other cause of injury, in fact begins with bystander response”
