Geriatrics is a growing population within the medical services. This is especially true for the Emergency Medical Services. Do you know how to handle these types of patients? Do you know what to expect and how to treat their co-morbidities in conjunction with their emergency? This course is designed to make you think ~in critical thinking mode how to assess, treat and the best possible transport method for Geriatrics.

This 8 hour course is designed to help the BLS and ALS provider learn about the differences in the Geriatric population.

Date: January 28, 2017
Time 8 am to 4 pm
Location: Valhalla Ambulance Corps

Sign up at NAEMT site for course number GE-17-0254-03
