Port Jefferson EMS

Upcoming Course Offering

NAEMT Emergency Vehicle Operator Safety

September 15th & 16th 2018 - 0900-1700

NAEMT's EMS Vehicle Operator Safety (EVOS) course addresses the knowledge gap that leads to injuries and deaths, and focuses on the specific behaviors that need to be changed to create a culture of safe driving. Drawing on the most current research about the behaviors and other hazards that lead to crashes, EVOS features case studies and analyses of both common and catastrophic collisions. EVOS challenges EMS practitioners to reconsider their preconceptions about safe vehicle operations. Instructors can easily incorporate local laws, rules and policies into the curriculum. Topics covered in the course include:

- Making driving safety a priority
- Legal aspects of EMS vehicle operation
- Maneuvering an EMS vehicle
- Vehicle inspection and maintenance
- Mental, emotional and physical preparedness
- Emergency response
- Crash prevention
- Driving skills
- Technological aids
- Simulation training

EVOS is appropriate for EMS practitioners at all levels. EVOS is accredited by CAPCE and recognized by NREMT.
