Putnam County Bureau of Emergency Services

TRAINING BULLETIN

FIRST RESPONSE TO NATURAL GAS & CO INCIDENTS

Class Date:      Tuesday, February 20th
Time:           1900 hrs
Location:       TOPS Building

COURSE DESCRIPTION: Central Hudson Gas & Electric will be presenting a brief power point presentation, “First Response to Natural Gas & CO Incidents”. Topics include working with Central Hudson and the proper handling of gas detected inside or near a building, fires located near or directly involving a pipeline facility, and explosions located near or directly involving a pipeline facility. The company representatives will also be available to discuss procedures that the company follows when they are made aware of a potential natural gas odor and/or leak. This will be a good opportunity to meet with the representatives who have made natural gas safety their profession.

There is also an online training available through a link on Central Hudson’s website. The training is divided into modules that can be completed at the student’s own pace. He or she can register by visiting the first responder training portal at www.CentralHudson.com/safety/first-responders to access videos and other training materials.

Designed For: All emergency response personnel
Course Length: 16 hours
