Transporting the Pediatric Patient

Improving Occupant Protection for Non-Critical Pediatric Patient in Ambulance: A Training Curriculum for EMS Personnel

Presented by ORMC and Orange County Traffic Safety

Estimates suggest that up to 1,000 ambulance crashes involve pediatric patients each year in the United States. This 4-hour course will review the issues, child restraint basics, considerations for ambulances with standard car seats and specialized systems, ambulance restraints and policy development of pediatric transport.

When: July 11th & 12th at 7:30 PM  2hrs each   Or July 21st 10:00 AM – 3:00 PM
Where: Orange Regional Medical Center Ground level Conference Rooms 1-3
RSVP: Please RSVP to jnowinski@ormc.org  or  845-741-8449

If you have an ambulance with a retrofitted child restraint system we are interested in having it in our class.

This is a non-medical control course. This course is developed the National Center for the Safe Transportation of Children with Special Healthcare needs and Indiana University School of Medicine.
