Psychological First Aid

Psychological First Aid (PFA) ... Because a large-scale emergency will overwhelm existing mental health response resources, psychological first aid—the provision of basic psychological care in the short-term aftermath of a traumatic event— is an important skill set that all public health workers should possess. Join Drew Fried EMT/CIC in an interactive, face-to-face training that provides public health professionals without former mental health education with the concepts and skills associated with PFA.

This class may be applied towards Preparatory or Elective under the NY State DOH EMS CME Recertification Program
