APRIL 6, 2019
SAFE TRANSPORT OF CHILDREN BY EMS

How are YOU transporting your pediatric patients?
Is it ever safe to transport a child on a parent’s lap? What are current best practices for transporting children in ambulances?

Improving Occupant Protection for Children in Ambulances: A Training for EMS Personnel is designed to teach EMS personnel about selection and installation of ambulance-specific pediatric safety restraints and some types of conventional child safety seats on an ambulance cot during pediatric transports.

Course size is limited - sign up today!
