The Annual Warren Wetzel, MD Trauma/Emergency Medicine Symposium represents the only regional conference dedicated solely to the management of trauma patients. As such, it has been able to attract a nationally recognized faculty. New York City has an extensive trauma system, and the Symposium provides an important forum for the sharing of science and ideas related to trauma.

Program Goals

Physicians and nurses should be aware of the many complex management strategies available for the treatment of the injured, in order to minimize complications and mortality. The educational goals of the Symposium are for the attendees to:

- Re-examine and review the latest on ultrasound use in trauma
- Discuss and learn about the specific issues related to the injured pregnant woman
- Bring attention and raise awareness of geriatric abuse
- Explore and review the most up-to-date management of thoracic trauma
- Listen and learn from an internationally recognized trauma surgeon as he shares his perspective on the profession of taking care of the injured
- Examine and elucidate the special issues related to the management of injured children
- Understand and review the impact of the Vision Zero program in New York City
- Obtain a firsthand perspective from a trauma patient survivor

When one considers the individuals who have left their mark on the history and reputation of Jacobi, one person immediately comes to mind: Dr. Warren Wetzel.

Dr. Wetzel was Chief of Trauma Surgery at Jacobi from 1986-1994. An innovative and widely respected surgeon, Dr. Wetzel was instrumental in the development of a Trauma Service which today enjoys national renown. He also developed a unique relationship with the herpetology staff at the Bronx Zoo, upon which he founded Jacobi’s Regional Snakebite Center.

Beloved by colleagues and staff alike, Dr. Wetzel possessed unparalleled surgical skill, remarkable leadership ability, deep compassion, and an intense devotion to Jacobi. He has left us with a legacy and an inspiration we will never forget.

-Rick Garvey, MD
