Recognizing Clandestine Drug Lab Operations

Where: Oxford Fire Department
When: Monday Nov. 25th, 2019 at 19:00 hrs
Instructor: NYS Fire Instructor James Shine

Pre-Registration is required by visiting our web page at www.chenangofireems.com and clicking on the training icon.

Description: Clandestine drug labs can be found in a variety of places, from a residence to a hotel room to a vehicle. They can manufacture a number of substances including methamphetamine, MDMA (ecstasy), or even steroids. The processes involved frequently utilize flammable liquids, corrosives, toxic gases, and water reactive materials. This course provides responders with the skills to recognize a potential clandestine lab situation and take the appropriate course of action. The course focuses heavily on production, especially the “one pot” method currently on the increase in New York, and deals with proper procedures for recognition, isolation, reporting, and dealing with victims and the “cooks” themselves.

Course length: 3 hours
Designed for: All first response personnel
