Advanced Wilderness Life Support

27-29 March 2020

Millbrook Marsh Nature Center
State College, PA

This fast paced and challenging course is designed for medical professionals who wish to begin to scratch the surface of practicing medicine in austere environments. This course provides a practical foundation in wilderness and austere care for medical professionals. The course will emphasize strong patient assessment techniques to make better treatment decisions in a resource limited environment. Head to our webpage for course details and to register!
