Training Announcement

Issued: December 16, 2019
Announcement #: 20-26E

Hemorrhage Control
Use the Force to Stop the Bleeding
Includes hands on skill review!

According to the Centers for Disease Control and Prevention, traumatic injury is one of the leading causes of death for people under 50 years of age in the United States. A large portion of those deaths are from severe bleeding – the most treatable cause of death due to trauma. Being able to control severe external bleeding can mean a matter of life and death.

Please join Drew Fried, EMT/CIC as he discusses the use of direct pressure, commercial pressure bandages, tourniquets and packed dressings. Students will have the opportunity to practice their skills with a hemorrhage simulation manikin.

This course may be applied toward Trauma or General Elective CME hours under the NY State DOH EMS Continuing Education Recertification Program.

Date(s) / Time(s): Saturday February 29th 9-11am
Targeted Audience: All First Responders
Program Location: Westchester County Department of Emergency Services Training Center
4 Dana Road, Valhalla, NY 10595
