Medical Casualty - Medical Surge

The focus of this program is to point out the differences between “conventional” MCIs and mass violence events when: the scene is dynamic, the number of patients far exceeds usual resources; and usual triage and treatment paradigms may fail. Join Drew Fried as he discusses the differences between hospital and pre-hospital triage, and how it might affect patient care. This course will not instruct students on any one specific triage method.

This course may be applied toward EMS Operations Core or General Elective CME hours under the NY State DOH EMS Continuing Education Recertification Program.

Date(s) / Time(s): Saturday, February 29th 11:30am- 2:30pm
